

Corrections of the Paper
“Definition of the Concept of Natural
Numbers and its Existence Theorem.
Solution of Hilbert’s Second Problem”

By

Yoshifumi Ito

Published in J. Math. Univ. Tokushima, Vol. 45(2011), 1-7.

(1) p.3, ↓ 1.8~ 1.9.

(Er.) (I) For the addition by which two elements $m, n \in \mathbf{N}$ correspond to their **sum** $m + n$, the following (1)~(3) are satisfied :

(Cor.) (I) The **sum** $m + n$ is defined for every two elements $m, n \in \mathbf{N}$. Then, as for the addition, the following (1)~(3) are satisfied :

(2) p.3, ↓ 1.15~ 1.16.

(Er.) (II) For the multiplication by which two elements $m, n \in \mathbf{N}$ correspond to their **product** $m \cdot n = mn$, the following (1)~(3) are satisfied :

(Cor.) (II) The **product** $m \cdot n = mn$ is defined for every two elements $m, n \in \mathbf{N}$. Then, as for the multiplication, the following (1)~(3) are satisfied :
